<b>Office Action Summary</b>	<b>Application No.</b> 10/526,024	<b>Applicant(s)</b> KAWATO ET AL.	
	<b>Examiner</b> Kriellion A. Sanders	<b>Art Unit</b> 1714	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☐ Claim(s) \_\_\_\_ is/are rejected.
- 7) ☒ Claim(s) 7 and 8 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 9 and 11 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Okamoto et al, US Patent No. 6,987,141.

3. A full description of the patented invention is set forth below. The invention of claims 1, 2, 9 and 11 is fully encompassed by the patented invention to Okamoto et al. See col. 30, line 64 through col. 38 , line 10.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1714

5. Claims 1-6 and 9-14 rejected under 35 U.S.C. 103(a) as being unpatentable over Okamoto et al, US Patent No. 6,987,141.

Okamoto et al discloses a polycarbonate resin composition (3) that comprises 100 parts by weight of an aromatic polycarbonate-polyorganosiloxane copolymer and an aromatic polycarbonate. The composition additionally comprises 0.05 to 1 part by weight of polytetrafluoroethylene. See col. 5, line 35 through col. 6, line 44 and col. 29, line 61 through col. 38, line 30. Patentee indicates that the composition may further include additional fillers and additives, specifically titanium oxide. See col. 37, lines 33-44.

The polycarbonate-polyorganosiloxane copolymer is defined by formula (III-4) and includes polydimethyl siloxane. See col. 31. The polyorganosiloxane content of the polycarbonate-polyorganosiloxane copolymer is from 0.5 to 10% by weight of the total polycarbonate resin. This overlaps the weight limitations of applicant's claim 2. See col. 32, lines 43-52.

Since patentee indicates that titanium oxide may be used in a generic sense and does not differentiate between any species of titanium oxide, it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to utilize any titanium oxide, including one having a surface acid or surface base content of 10  $\mu\text{mol/g}$  or more absent a clear showing of unexpected results attributable to the surface acid or base content.

The composition also includes a component D), which is an additional polycarbonate-polyorganosiloxane and meets the limitation of applicant's claim 6. See all of col. 34.

Art Unit: 1714

The compositions are injection molded to produce articles that are useful for example in an electrical apparatus. Therefore a molded sheet or film useful in an electrical apparatus would have been contemplated at the time of applicant's invention.

Polycarbonate compositions have long been recognized for their use in formulating plastic lenses, such as found in a light reflector. Formulation of such a component is obvious. Since a component and its function may not be separated, properties attributable to the titanium oxide additive, such as reflectance values, would be inherent in the compositions of Okamoto et al, since patentee clearly suggests the inclusion of this component.

6. Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The alkoxysilicone or alkylhydrogensilicone of applicant's claim 7 is not suggested by the reference

The organopolysiloxane having an alkoxy group that binds to a silicone main chain through a methylene group of claim 8 is not suggested by the reference.

### ***Information Disclosure Statement***

Japanese reference 5-320519 cited on applicant's form 1449 provides a cumulative teaching.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kriellion A. Sanders whose telephone number is 571-272-1122. The examiner can normally be reached on Monday through Thursday 6:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
